Evil

"What is evil?"

'Abdu'l-Bahá: "Evil is imperfection. Sin is the state of man in the world of the baser nature, for in nature exist defects such as injustice, tyranny, hatred, hostility, strife: these are characteristics of the lower plane of nature. These are the sins of the world, the fruits of the tree from which Adam did eat. Through education we must free ourselves from these imperfections.[pg 178] The Prophets of God have been sent, the Holy Books have been written, so that man may be made free. Just as he is born into this world of imperfection from the womb of his earthly mother, so is he born into the world of spirit through divine education. When a man is born into the world of phenomena he finds the universe; when he is born from this world to the world of the spirit, he finds the Kingdom."
